Meister 14mm T2.6

Meister 24mm T1.3

Meister 35mm T1.3

Meister 50mm T1.3

Meister 85mm T1.3

Anamorphic 50mm T2.3

"The XEEN Meister series is a beautiful set of lenses. The caveat is that XEEN hasn't compromised on performance if XEEN had attempted to make the lens lighter and smaller they would have had to sacrifice image performance."

Mark Hobz, Cinematographer

XEEN Meister Main Features

- Unprecedented Resolution
- Exceptional background separation
- Fastest T1.3 Full-Frame Cine Prime Lens
- Compatible with PL, Canon EF, Sony E mount

XEEN Meister Look & Feel

Fastest T1.3 Prime Lens

Superior low-light performance. Capture breathtaking visuals and dramatic moments in challenging lighting conditions

Smooth & Precise Control

Capture crisp details and vibrant colors in fast-moving combat scenes

Higher Resolution & Contrast

Capture bright highlights and deep blacks without losing details or introducing unwanted artifacts

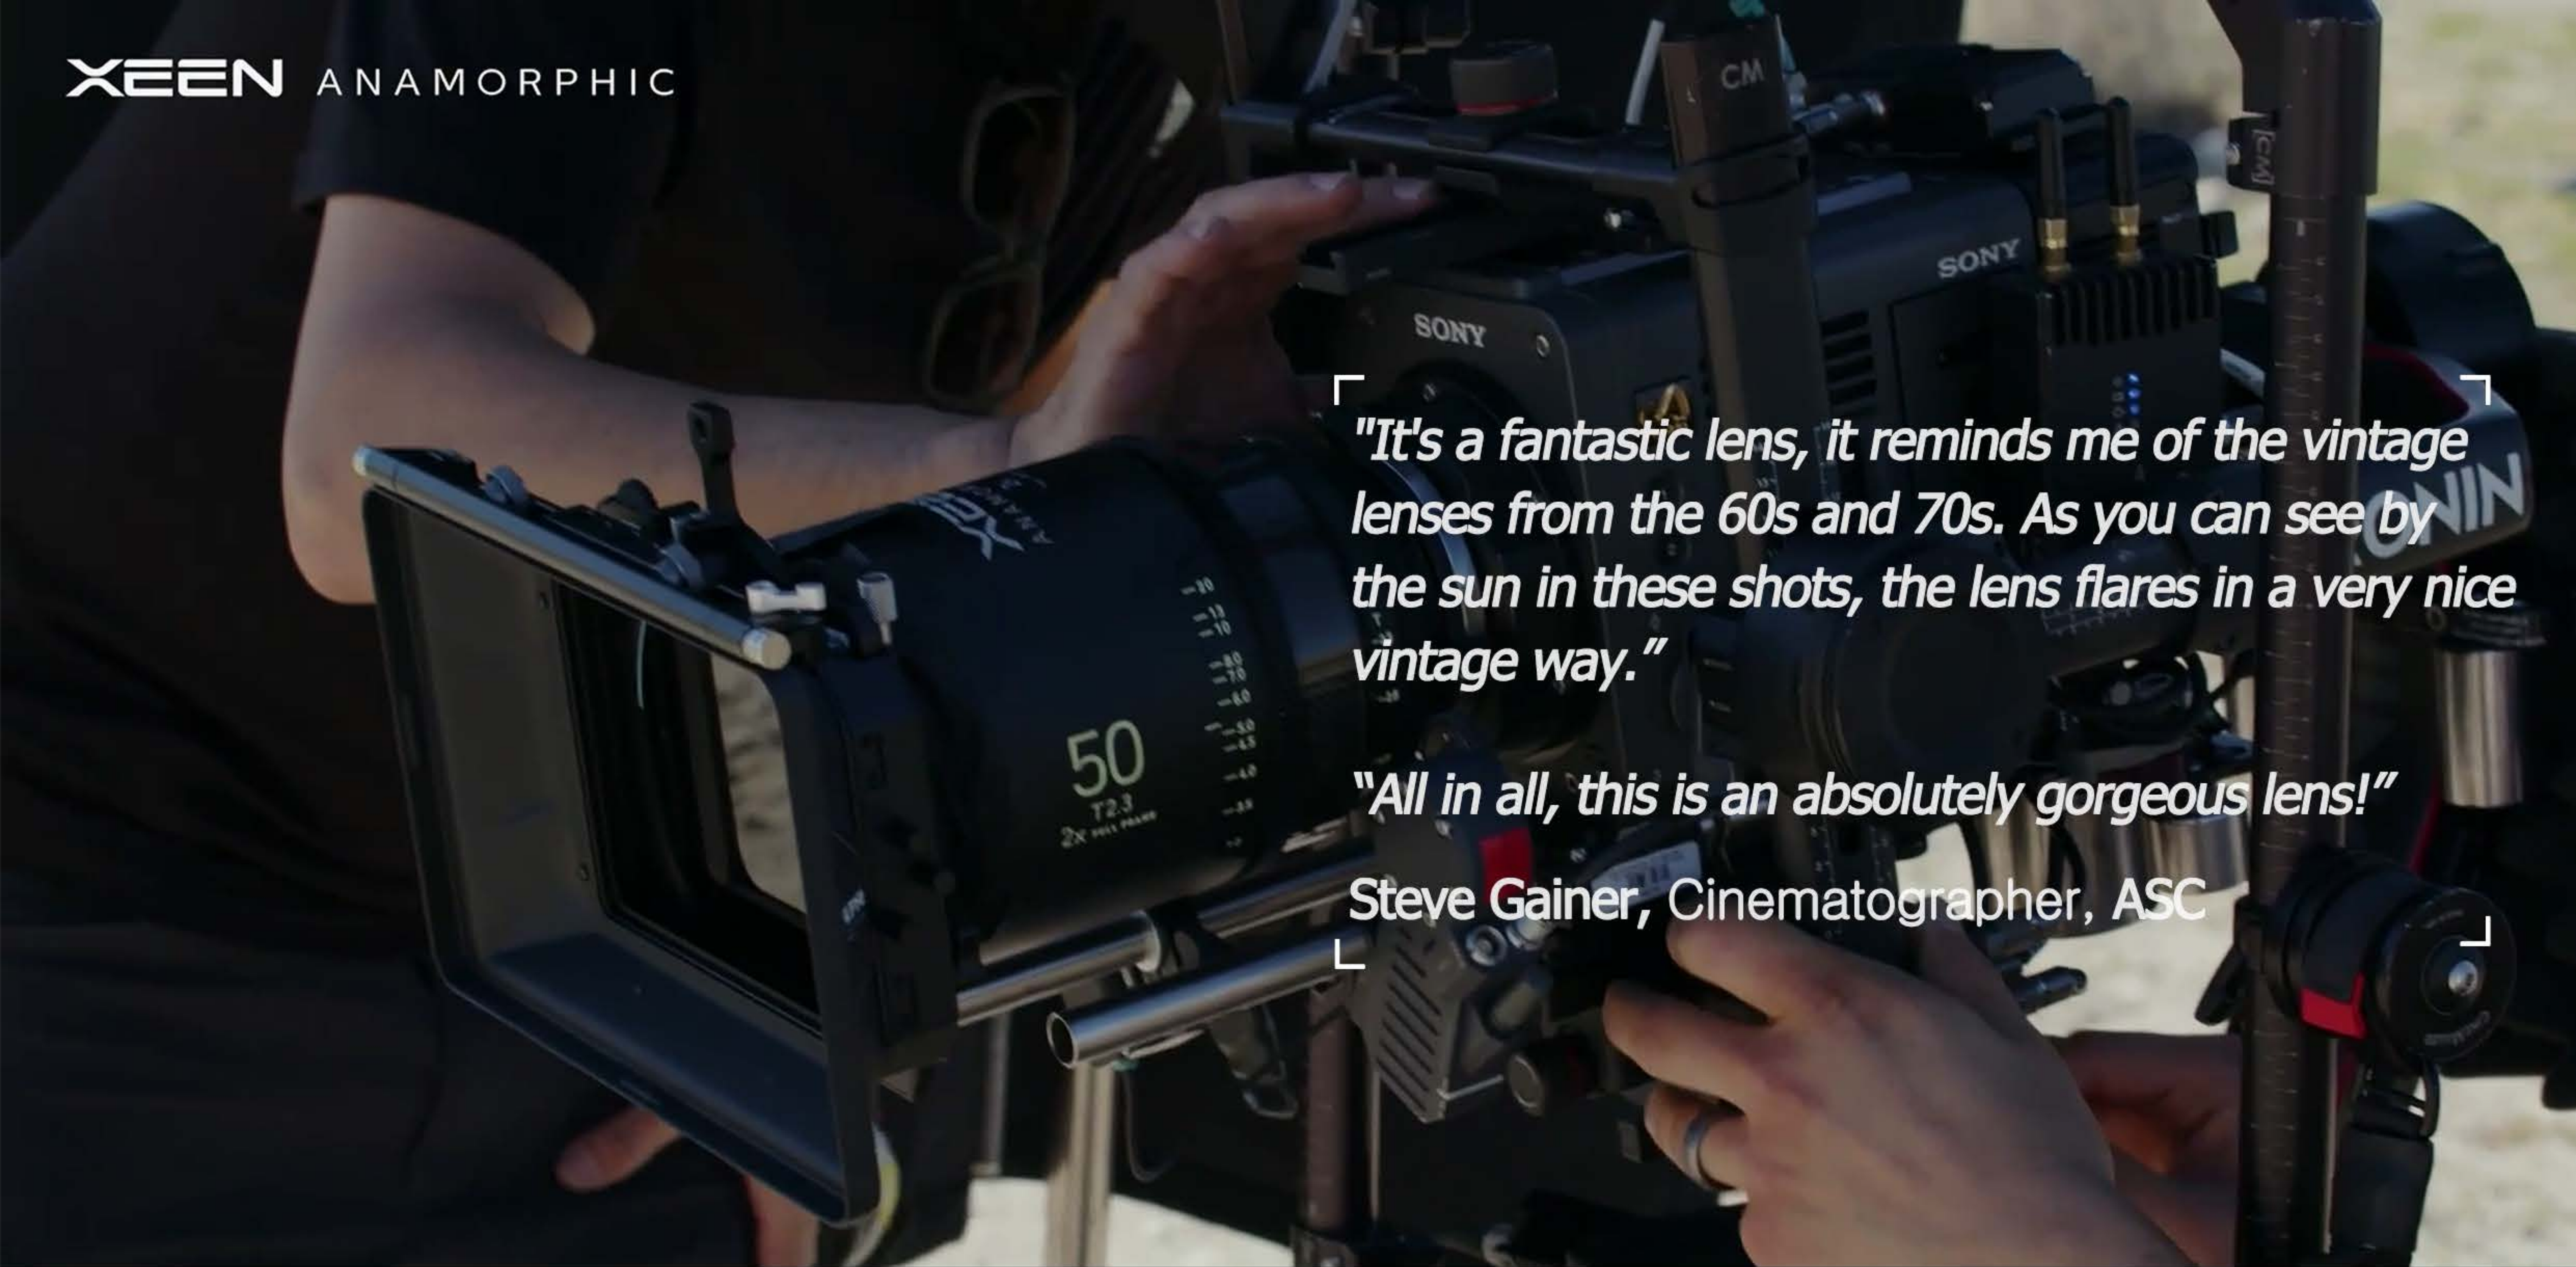

Cinematic Look

Cinematic look by creating a pleasing separation between the subject and the background

Technical Data

Model Name	Meister 14mm T2.6	Meister 24mm T1.3	Meister 35mm T1.3	Meister 50mm T1.3	Meister 85mm T1.3

Mount (PL, Canon EF, Sony E)	PL	PL	PL	PL	PL	
Size	Ø134.0 x 92.9 mm	Ø128.0 x 122.0 mm	Ø128.0 x 122.0 mm	Ø128.0 x 122.0 mm	Ø128.0 x 122.0 mm	
Weight (without lens cap)	1.5 kg / 3.3 lb	2.0 kg / 4.4 lb	1.9 kg / 4.2 lb	2.3 kg / 5.1 lb	1.9 kg / 4.2 lb	

"It's a fantastic lens, it reminds me of the vintage lenses from the 60s and 70s. As you can see by the sun in these shots, the lens flares in a very nice vintage way."

"All in all, this is an absolutely gorgeous lens!"
Steve Gainer, Cinematographer, ASC

XEEN Anamorphic Main Features

- Beautiful Skin Tones and Precise Color Rendition
- Low Distortion for Uncompromised Anamorphic Capture
- Cinematic Bokeh with High Contrast
- 2X Anamorphic: Magnificent & Highly Immersive

XEEN Anamorphic Look & Feel

Cinematic Bokeh

Cinematic bokeh with high contrast and nice focus fall-off

Beautiful Skin Tones

Beautiful skin tones and precise color rendition

Low Distortion

Low distortion for uncompromised anamorphic capture

Large Image Field

Large image field for full freedom in composition

Fast T-stop

Fast T-stop for shallow depth of field

Technical Data

Model Name		XEEN Anamorphic 50mm T2.3
Maximum T-stop		T2.3
